

LabVIEW Developer Days

Build Code. Form Communities. Gain Confidence.

Effectively Building Proficiency with LabVIEW

What did you hope to get out of today?

Build on your skills

- Increase your value to the organisation that you work for
- Increase future career prospects

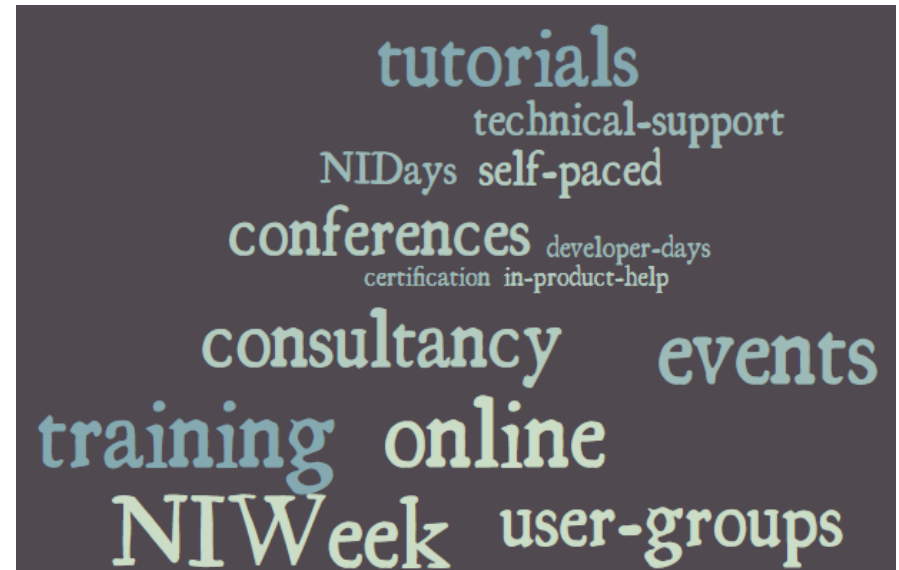

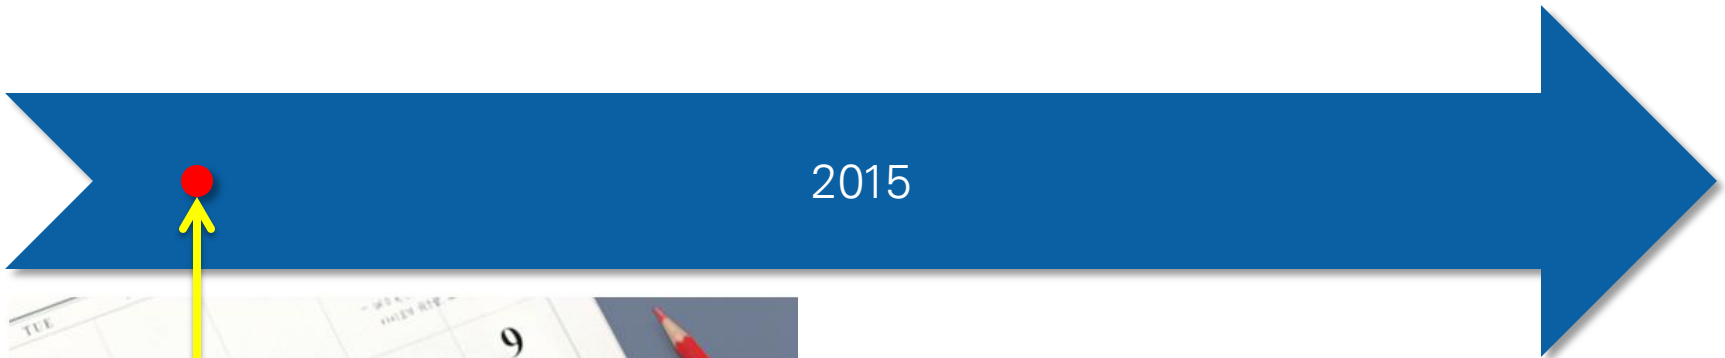

Increase productivity

- Decrease development time
- Decrease stress

Ensure project success

- Make sure requirements are met
- Come in on time and on budget

What else can you do to work towards those goals?

Software Service

Included with Standard Service Program (SSP)

Phone and Email Support From Applications Engineers
» Save Time Troubleshooting «

Exclusive Online Training Modules
» Increase Proficiency at Your Pace «

Future Software Updates and Upgrades
» Always Leverage the Latest Technologies «

Download Older Versions of Software
» Ensure Quick Access to Existing Software «

The NI Software Standard Service Program (SSP) lowers the total cost of ownership and gets you on the path to success faster.

Software Service Programs

Increasing Seats in Use ↑

Single Seat

Service includes:

- Software updates & upgrades
- Technical support
- Online training

Volume License Program

Service includes:

- Single Seat services +
- Asset management
- User community
- Simplified purchasing

Enterprise Program

Service includes:

- Volume License services +
- Unlimited software
- Training access
- Consulting services
- Written success plan

Training

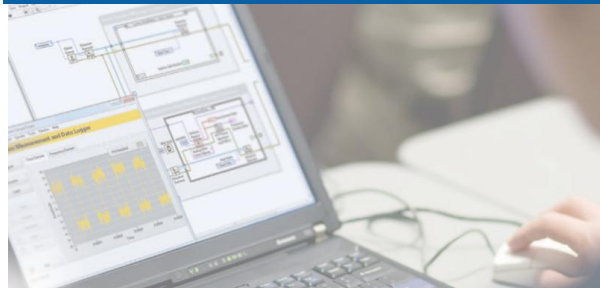

NI Customer Education Program

Innovate With Confidence

Be confident you have the skills you need to design and develop high-quality applications that will scale as your projects evolve. NI Training and Certification prepares you to create quality code that you can reconfigure and reuse to effectively configure and control your applications.

Reduce Development Time and Costs

A recent survey indicates that customers report 66 percent faster learning, 50 percent quicker development, and 43 percent less maintenance after taking NI training courses.

Validate Your Expertise

NI Certification demonstrates that you have the skills you need to create high-quality applications with NI software platforms, and gives customers, peers, and employers confidence in your abilities. Join more than 17,000 NI-certified professionals who attribute improved job prospects, work quality, and project opportunities directly to their certifications.

NI Training: Reduce Development Time and Costs

*"I estimate that the training courses have saved me more than **150 hours** in self-paced learning time to get to an equivalent skill level."*

Thomas Sumrak,
Test Engineer,
PAR Technologies LLC

66% faster learning

50% faster development

43% less maintenance

Certification

LabVIEW Certifications

Be Recognized for Your Expertise!

CLA: Architect

- Mastery of LabVIEW
- Expert in large application development
- Skilled in leading project teams

109

CLD: Developer

- Advanced LabVIEW knowledge and application development experience
- Project management skills

277

CLAD: Associate

- Foundational LabVIEW knowledge
- Some application development experience
