

ENGINEER
NEXT
NIDays

The logo is centered on a blue background with diagonal stripes. It features the words "ENGINEER" and "NEXT" in a large, white, sans-serif font, stacked vertically. A yellow graphic element, resembling a stylized 'X' or a folded ribbon, is positioned between the two words. Below "NEXT" is a white rectangular box containing the text "NIDays" in a smaller, white, sans-serif font. The entire logo is tilted at an angle, matching the background stripes.

SystemLink

Managing Deployed Systems

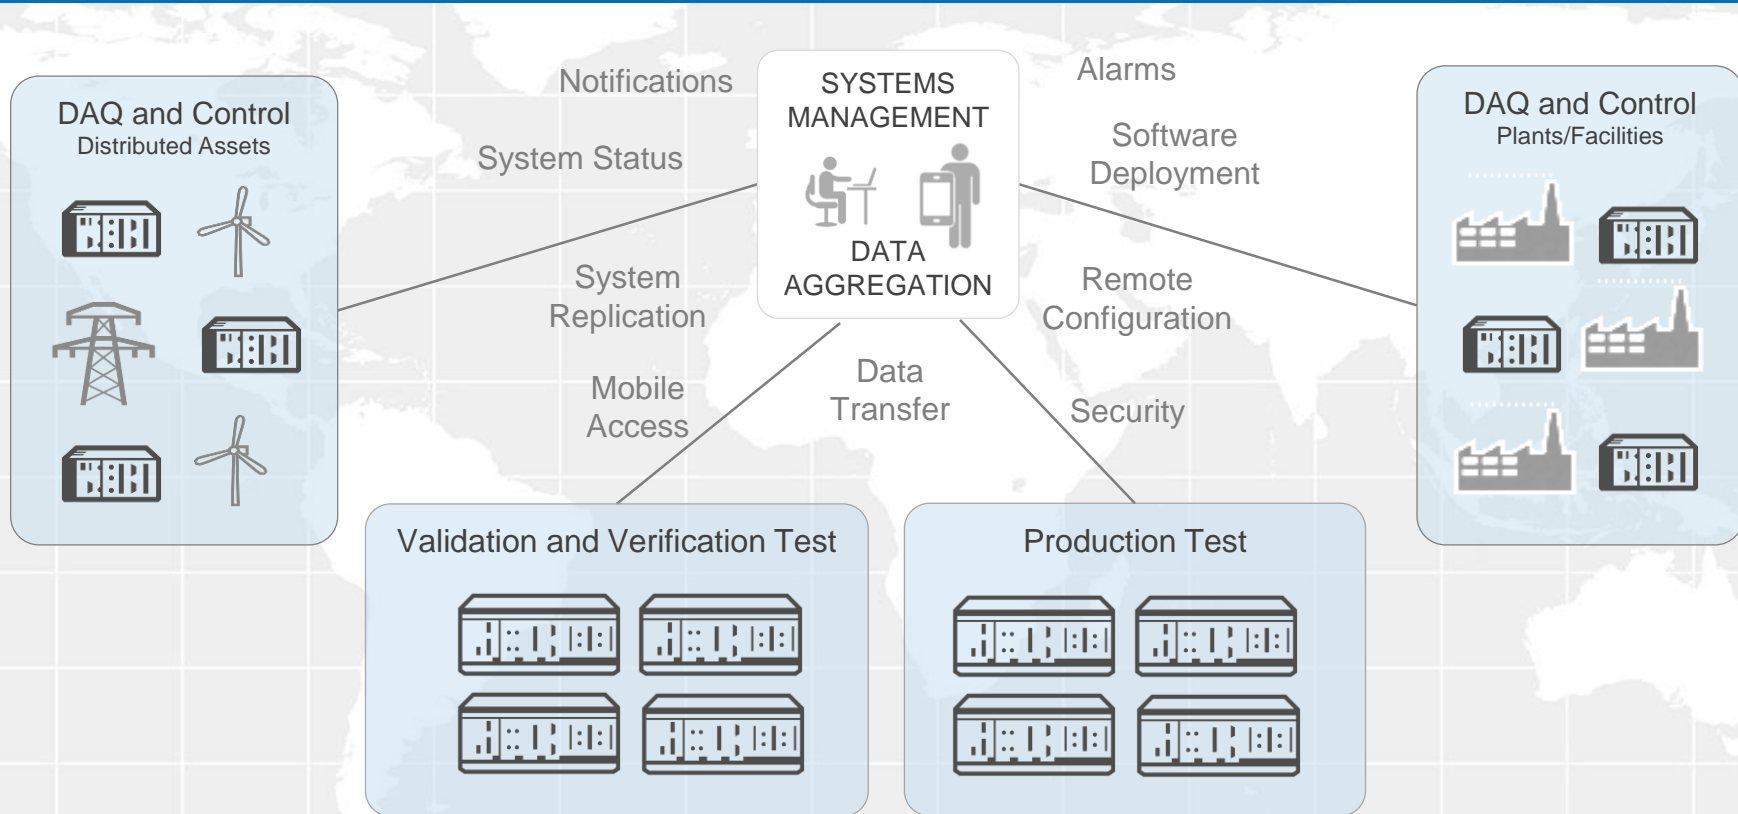

NI SystemLink EAR

Agenda

- Introduction and Product Overview
- Demonstrations:

- Product Roadmap
- Release Outlook

Challenge: Managing Deployed Systems

Customers with distributed systems often encounter challenges in the management of devices, software, and data

SystemLink™

EARLY ACCESS RELEASE

Manage distributed systems with web application software that enables mass software deployment, device management, and data communications.

- Track and manage a group of connected systems
- Gain application access via web browser or mobile
- Install on premise or with a cloud service provider

PRODUCT FEATURES

DEVICE MANAGEMENT

Register hardware targets and classify systems through a shared interface.

SOFTWARE CONFIGURATION

Deploy software to multiple remote targets with upgrade, downgrade, and uninstall.

New module available in early 2018

SYSTEM HEALTH MANAGEMENT

Track and manage hardware health with alarms and notifications.

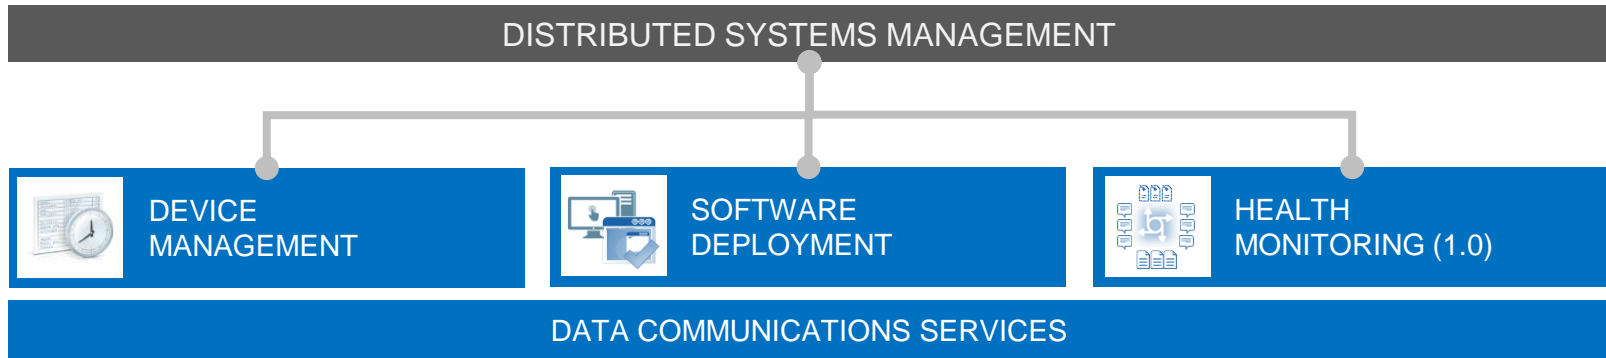

DATA COMMUNICATIONS

Automate data transfer among connected nodes using LabVIEW or web APIs.

SystemLink™ Capabilities

Achieve centralized administration and efficient management of devices, software, and data.

Aligned with enterprise standards and IoT best practices

Device Management

View and manage detailed system and device information

Search systems
across all groups

Track systems
through a central
web interface

Classify systems
into groups

Multiselect to
perform remote
functions in parallel
(e.g., install, restart)

Software Deployment

Deploy software installs and updates

- ✓ LabVIEW applications
- ✓ NI drivers
- ✓ Non-NI software
- ✓ Supporting libraries, docs

- Mass deploy software to a group of systems simultaneously
- Update software at a component level
- Install with dependency awareness and install only the software necessary
- Manage version history to allow restoration to a previous software version

Automate and manage data transfer throughout distributed systems

[illegible]

SystemLink™ Architecture

Open and Extensible

APIs for LabVIEW and web services

Compliance with several open-source standards

Cloud-Ready

Installation on premise or in the cloud

Cloud-centric developments on the horizon

Optimized for Distributed Nodes

System functions execute in parallel

Targets, server, and users can be on multiple networks

Secure

Data communications are encrypted via TLS

Secure user access: LDAP and AD integration

SystemLink™ Early Access Release (EAR)

Why Early Access?

- Start adding value for customers
- Allow time for NI software to migrate to packages
- Allow NI to limit marketing and focus on first wave of customers

Notable Package Limitations

- CompactRIO driver not in package format for deployment
- TestStand has limited options for deployment
- Support expanded in both cases in 2018

EAR Customer Benefits

Why should I get involved early?

- Product roadmap influence
- Unique access to product leadership (R&D and product management)
- Ability to deliver value to your business and establish competitive differentiation
- Product quality criteria is similar to the general release

Demonstration

ADDITIONAL RESOURCES

Software Deployment Process

Integration with package management framework

CREATE PACKAGES

A standard container framework for distributing and installing software

UPLOAD TO REPOSITORY

A central location to store software packages for distribution to hardware; typically the SystemLink™ server

Feeds: Virtual collections of packages to associate with hardware targets

Mass Deployment of Software

Software Roadmap

Roadmap

Expanded Deployment

- CompactRIO driver
- LabVIEW RT run time
- TestStand

Deployment Enhancements

- Deployment schedules
- Install and process prioritization
- Job queues for online/offline

System Asset Management

- Utilization reporting
- Inventory and audit history
- Configuration reporting

2018

System Health Management

- Alarms | notifications
- Status and trend
- Visualization

Access and Permissions

- By system node
- By data object (tag/file)

2017

Cloud Marketplace

- Amazon AWS
- Microsoft Azure

2018

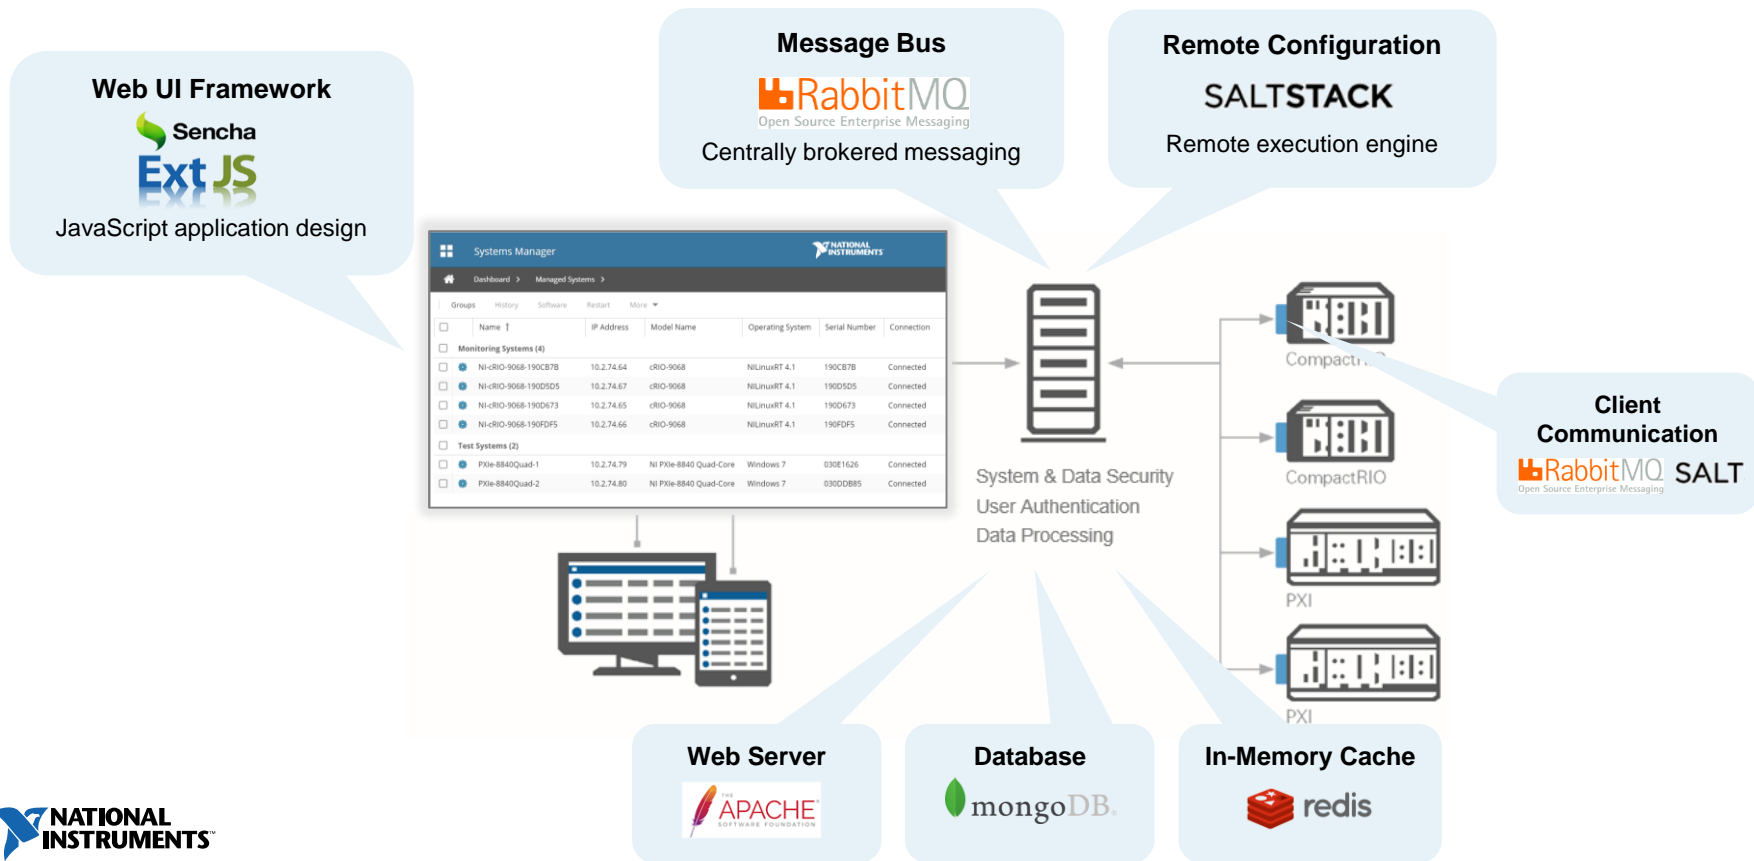

Tag Data Visualization

- Standard UI controls
- No programming required

Architecture

Open-Source Technology

SystemLink™ incorporates best-in-class, open-source software technology
