

National Instruments Medical Device Grant

Application Form

The majority of the most innovative advances in medical technology over the past twenty years have been developed by small, entrepreneurial medical technology companies. These technologies are continually advancing and improving the health care and quality of life for countless individuals worldwide. To support and further this effort, National Instruments has created a grant program to allow medical device makers easier access to the world's most advanced and accessible embedded design technology.

Please include the following information in your application. Any application that does not contain all of the following will not be considered incomplete and will not be eligible.

Personal Information: Name, Address, Email address

Company Information: Company Name, Year founded, Number of employees, Number of medical devices currently on the market

Prior Experience: Do you have prior experience with National Instruments hardware/software? If so, how much experience?

NI Sponsor: Who is your National Instruments sponsor? This is usually your local field engineer. Please contact your NI sponsor before submitting your application. If you do not know your local engineer, call

Project Information: Hardware platform that you have/will be purchasing, Software and training that you will need.

Essay (> 500 words): Please describe your device in detail. How do you plan to use NI hardware and software?

Please submit your completed application to medicalgrant@ni.com in electronic form. The applications will be reviewed by an NI committee, and National Instruments representative will contact you within two weeks of the application receipt.
